OBI WELCOME 2024

Once again, I am very pleased to be working with the Stigings to present their 6th Annual Bull Sale. This family is very hard working one with one goal in mind; to produce very functional cattle to raise for themselves and their bull customers. This year's offering is the best yet to date.

Riverside Angus is a program that continues to go in the right direction acquiring top end herd sires to go with their strong foundation cow herd. The consistency in the line up brought to town shows this exact statement. The bulls are fed in a large pen with do ability and exercise kept in mind. These bulls travel well while having the size and haircoats we all desire. This year they have added 4 open heifers as well. We have numerous feature bulls both Black and Red this year, so please do take the time to analyze the catalog and come see these bulls this year.

Both are great operations so if you need any assistance, please feel free to call myself, Roger or any of the Riverside Angus Family members and we will be glad to help you.

Mark Holowaychuk, OBI Livestock Ltd.

RIVERSIDE ANGUS

WELCOME TO THE 6TH ANNUAL RIVERSIDE ANGUS BULL SALE

On behalf of everyone here at Riverside I would like to welcome you to our sale April 8th 2024 at the Innisfail Auction Market. With this our 20th Anniversary in the Purebred Industry we have pulled out all the stops and have put together an exceptional set of bulls for your appraisal.

Twenty years in the Angus industry it seemed what better time to make a few changes to the sale itself and host what will be an exclusive "Riverside Angus Sale", which we could not be prouder of and worked very hard for. I would like to take a moment to thank Dersta Farms, Derek and Stacey Mathon for being our guest consignor the past 5 years and wish them all the best as they host their own sale this year.

Our offering this year continues to express with out a doubt what we strive for in our own herd. Our mama cows are honest and hard working. They're easy fleshing, sound of foot, with exceptional udders all traits that are all extremely important to us when we are choosing replacements or adding a new herd Sire .

We have an outstanding line up of Black Bulls, leading the way is an exciting group of Calving ease Bulls sired by Sitz Major 707F we are so excited for this progeny, another exciting trio is the first offering of our New Walking Herd Sire HF Spittin' Image 165J, I truly believe this bull is destined to do great things here at Riverside, I have never been confident in saying we have had a bull that can make great females as well as outstanding bulls all in one package but it seems that Spittin' Image is that bull we are so excited about this guy's future.

We are very excited to present the 2nd offering of the Red Riverside Bulls, leading the way is a trio of Flush brothers sired by Red Duff Red Bear and the dam is none other than Red Six Mile Marta 538D, 2 of the 3 made quite an impression on the show road this past fall wining us many banners along the way. Not to be out done by the rest Red offering sired by Diamond T Get Smart.

As always, the bulls are fed a TMR ration consisting of a Pea Barley Silage Mix, Straw, Barley and a Malt Sprout Pellet, along with a specific mineral premix that matches their needs specifically. The bulls are raised in a large pen with plenty of room to move and naturally build muscle.

Also we want to thank all our family and friends who support us and help us out whenever needed we truly would not have made it this far without all of you.

Hope to see you all Sale day!
Thank you

Reference Sires

HF SPITTIN IMAGE 165J

In 2022 we were looking for a bull that we could use on heifers and then turn him into a main walking sire. After a long spring of looking for a bull, we came across Spittin Image at Hamilton's and knew he was the bull for us. He was stout made with extra muscle, an excellent foot in a calving ease package. He is a bull that has one of the most prevalent and predictable pedigrees in Canada. His dam is the fantastic HF Mayflower 191Z who is also the dam of HF Alcatraz 60F. The second set of Spittin Image calves are now on the ground here and they continue to impress.

LLB BRADY 584G

It's safe to say Brady moved our herd in an upward direction. He sired calves that come easy and grow, they have excellent feet and fantastic temperaments. We are now calving multiple "Brady" daughters and they are impressive as well. Brady was our selection of the bulls at LLB in 2020 he was their high selling yearling bull, and we are extremely happy we were able to purchase him. Unfortunately, we lost Brady last fall due to a shoulder injury. His legacy will continue to be felt in our program for many years to come.

SIX MILE CROSSFIRE 640F

A true female maker. He continues to sire the top set of heifers in our program every year. His daughters and now coming granddaughters are extremely well-uddered and productive. His sons have excellent growth after birth with a real herd bull look. Crossfire continues to be a bull we can put any cow with and we know exactly what we will get whether it is a bull or a heifer. When Logan and Roseanna toured Six Mile in the fall of 2021 they got to see Crossfire's dam and one of his maternal sisters and they were definitely the reason Crossfire sires such great females.

SITZ MAJOR 707F

We used Major in our AI program on our heifers. When we were looking for a bull to use we wanted a bull that was an outcross to our program. Major's calves come very moderate, get up fast and do nothing but grow from there. We will look to incorporate Major in our programs for years to come..

We can't say enough about this bull. Big middled, soft made in a calving ease package. We showed 130L this fall with a great deal of success. He won his very competitive split at Canadian Western Agribition. 130L is out of a first calver and she absolutely got it done with her first calf while breeding back in the first cycle. She is a beautiful Brady daughter that has an excellent udder and fantastic feet. 130L has a 76lbs BW and an impressive Adj WW of 837.

Terms to be Announced.

**SIRE OF LOTS 1, 2, 8, 9
 SITZ MAJOR 707F**

DAM - RIVERSIDE ERICA 130J

4L is a complete made individual, well balanced and well-built from the ground up. We bought his dam as an embryo from the great people at Bova Tech. She is an outcross pedigree for our herd and is proving herself every day, weaning an impressive calf with her first try, and breeding back in the first cycle. We are very confident that the Major sons will be excellent heifer bulls without giving up any performance.

Legacy is an impressive individual with a real herd bull presence about him. He is backed by our great 20Z donor cow. 10L has an excellent foot and moves with ease around the pasture. He has been a standout since birth. He weaned off at 824lbs with an impressive 1419 YW. His dam has produced 16 calves for us, every one of her bull calves have been sale highlights and her daughters are very attractive females that are great uddered and prolific producers. **Retaining 1/3 Semen Interest.** We would like to draw semen at the new owner's convenience.

SIRE: MYERS FARI N SQUARE M39

DAM - RIVERSIDE ROSEWALL 20Z

181 is a bull we are very high on, combining our most prolific cow family, the Ina's, with the Great Schiefelbein Showman 338. This bull is sure to leave you with daughters that are good uddered, attractive, and productive. Showman 338 is one of the most talked about bulls in the industry. The best way to incorporate him into our program is to use him on our very best cows. 181L's flush sister could very well be our best heifer in the replacement pen this year. We think this guy will make an excellent addition to anyone's herd bull battery and would definitely work on heifers.

Here is a bit of a different twist on a heifer bull. In 2022, when we were AI'ing heifers, we decided to put a few straws of Power Chip in, and we are glad we did. Power Chip sired calves come easy and grow well after birth. 92L's dam is a good uddered Hot Lotto daughter.

6

18L brings a lot of the same attributes to the table as his sire. He is big ribbed with extra muscle in his rear third. 18L's dam is one of the most complete females we have ever raised on the farm. She has a high-quality udder and is getting it done in production, weaning 18L at 810 and breeding back first cycle. His granddam is none other than the 18U cow that has progeny excelling in many of our long-time customers' programs. She was designated Premier in 2017.

Another fantastic Spittin Image son that is big ribbed, big hipped and big nutted. His dam is the granddam to the Lot 1 bull. When we bought Spittin Image, we decided to test him on a few young cows to see how he would perform on the main herd, and we are quite pleased with the results. With an impressive 807lbs WW, 13L is sure to add performance and maternal strength to your cow herd.

If you are looking for a heifer bull with a proven maternal lineage this is the guy for you. His grandam was designated premier in the Canadian Angus Herdbook in 2021 with 9 calves and 7 grand calves. We think 11L's dam is going to do the same for us, she is definitely on our radar to become a donor dam. Not only did she raise 11L, but she has one of the most impressive bull calves on the farm this year as well.

There is no better way to lead of the Crossfire sired bulls than with this guy. Everyone who has toured our herd knows that the Crossfire Ina cross has left us with some fantastic females. They raise big calves and are extremely easy on the eyes. With the rising calf prices, pounds will pay. 201L weaned at 824lbs.

LOT 26

These 3 flush brothers are backed by one of the most prolific cow families in the Six Mile herd. In 2021, we had the opportunity to purchase Marta 538C from Six Mile. We knew she was a female that could anchor our Red Angus program, and she is doing just that. The flush to Red Bear exceeded our expectations, leaving us with three outstanding bulls and three beautiful heifers. We are honored to say that one of the heifer calves was the high selling heifer calf at the 2023 Red Round Up, selling for \$16 000 to Wilbar Cattle Co. 305L is long made, smooth shouldered with a real herd bull presence that catches your eye when you walk in the pen. We feel that all three of these flush brothers are heifer safe. We showed him throughout the fall with great success. He was Champion Intermediate Bull Calf at Old Fall Classic and stood third in a very competitive class at Canadian western Agitation. He was also one of the three calves that won Champion Get of Sire at Olds Fall Classic, standing beside two of his flush mates. **Retaining 1/3 Semen Interest. We would like to draw semen at the new owner's convenience.**

There are not many opportunities in a year to purchase a proven heifer bull of this quality. 212K has a big square foot and is backed by one of the most proven up and coming pedigrees in the Red Angus industry. I have seen plenty of Typhoon offspring and they are doing their part. They have extremely good foot quality, and the young females are proving themselves in production. We feel this guy has the quality to become a big-time herd sire. His dam is an excellent cow, with good feet and an awesome udder. We used 212K as our walking heifer bull for the Red Angus and commercial heifers last year. His calves come easy, get up fast, and flat out grow. Due to the limited numbers on the red side, we are giving everyone the opportunity to jump in and get a sire that will no doubt move their program in the right direction.

innvet@telus.net

Welcome to the 2024 Riverside Angus 6th annual Bull Sale! All of the bulls at Riverside Angus farm have had a complete herd health check and semen evaluation prior to the annual sale.

This herd health program begins prior to these bulls being born. All the cows on Stigings farm receive a Bovi Shield Gold FP5, Bovilis Covexin Plus, and Scourbos 9 at pregnancy checking time in the fall as well as Ivermectin pour on. This maintains the overall health of all the cattle present on the farm which in turn provides a headstart on the immunity of these bulls before they even hit the ground.

At birth, all calves receive Inforce 3. Followed by 2 doses of Bovi Shield Gold FP5 and Vision 8 Somnus. These are administered at pasture turnout and weaning in the fall. They all receive Ivermectin in the fall and Clean-Up in the winter for lice control if needed.

We are grateful for being able to work alongside Stigings Family to provide the group of outstanding bulls. Everyone at Riverside Angus continuously goes beyond in their care of all the animals on the farm. They provide excellent service to each person that purchases one of these bulls. If you have any questions regarding their program or health of these bulls, feel free to contact Dr. Rob DeHaan at Innisfail Veterinary Services

Warm regards,

Dr Rob DeHaan
Innisfail Veterinary Services

BLUE ROCK ANIMAL NUTRITION

Riverside Angus is an operation that we have worked with for nearly a decade. They are an example of a top-quality producer who sets the bar for quality angus cattle in Western Canada. The nutrition team at Blue Rock Animal Nutrition work with Tanya and Terry to build a nutrition program for their livestock. The bulls are fed a balanced TMR that supports steady growth, maximizing their longevity and genetic potential. We look forward to continuing to work with Riverside Angus and celebrating their growth and future success.
